

We can work together to
build a more beautiful Frisco.

*The City of Frisco's
Environmental Ser-
vices can help your
school to create en-
viro-classrooms, begin
inventive recycling
programs at your fa-
cility, get community
service hours, find
new and interesting
ideas to motivate and
educate your students,
learn how to be a
"Green" school, and
keep Frisco a beauti-
ful eco-friendly city.*

Together we can make a difference.

**Frisco
Recycles,
Do you??**

Environmental Services What we do...

The City of Frisco's Environmental Services works throughout the city to help create, manage, and build awareness of community recycling, litter prevention, hazardous material collection, and general environmental friendly practices. We do this through a number of activities including, school visits, our curb-side recycling program, advertising and articles, community clean-up events, our hazardous waste collection and recycling center, community outreach and education, and through volunteers like you!

How we can help you

Are you looking for activities for your "Green Team" or service oriented projects for students and don't know what to do? Are you working on expanding your volunteerism levels, looking for some help with a particular activity dealing with the environment? Is your school working on an environmental project and would like more information, site-visit, or guest speaker?

Then you have come to the right place.

We have visited many Frisco schools to help teach eco-minded ideals and find worthy, responsible, community oriented service projects dealing with the environment.

Some project ideas include:

- ☆ Setting up recycling programs at your location
- ☆ Building Texas drought resistant gardens at your school
- ☆ Developing new collection or recycling programs for special "Recycle" day programs.
- ☆ Developing water conservation programs for your facility
- ☆ Citywide "Clean it and Green it" trash pickup events. These are done 4 times a year
- ☆ Park cleanups and litter pickups

We also hold live and taped performances for large and small groups on topics such as:

- ☆ Recycling
- ☆ Litter
- ☆ Conservation of resources
- ☆ Where trash goes
- ☆ Xeriscaping
- ☆ Others to correspond to your lesson plans
